

### Practice Activity Number 13

Let's practice making a Windows Form.

1. Create a Windows Form.
2. Add a Text Box where you can enter a string.
3. Add a Label before it saying "My text is".
4. Add four buttons:

The first button should add the word "This " (with a space after it) to the Text Box.

The second button should add the word "is " (with a space after it) to the Text Box.

The third button should add the word "my " (with a space after it) to the Text Box.

The fourth button should add the word "program." to the Text Box and create a Message Box to output the contents of the Text Box..

5. Run the program, and then use the buttons to enter "This is my program."
