

Practice Activity Number 9

Let's practice creating arrays.

1. Create a single-dimension array which contains people's name.
 - Add John Smith, Jane Smith, Phillip Burton and Fred Bloggs.
2. Output the contents of the array using a For loop.
3. Create a multi-dimension array which contains people's first name and last names.
 - (,0) should contain a person's first name.
 - (,1) should contain a person's last name.
 - Add John, Smith, Jane, Smith, Phillip, Burton, Fred and Bloggs into the array.
4. Output the contents of the array using a For Each loop.
